Walter Dalla Torre Neto

Backend Software Developer

Software Architect and DevOps Engineer with solid experience in backend development, high-performance systems optimization, and cloud infrastructure management (AWS and Azure). Proven track record of reducing operational costs, improving SLA, and technical team leadership. Expert in microservices architecture, database optimization, and observability implementation in critical financial sector environments.

walterdallaprofissional@gmail.com | +5519994691881 | São Paulo - SP, Brazil | walter-dalla | Walter-Dalla

SKILLS

Claude | Codex | AI Skills | Agentic coding | Agentic orchestrator | .NET CORE | Java | C# | AWS | Azure | DynamoDb | SQL Server | DataDog | Splunk | MySQL | PostgreSQL | Microservices Architecture | Team Work

WORK EXPERIENCE

Senior AI-Oriented Fullstack Developer

AgileEngine

Jul, 2026 - Present | Delaware, United States - Remote

Achievements/Tasks

- Developed healthcare software solutions using **AI-driven** software engineering workflows, leveraging **Anthropic Claude** and **OpenAI Codex** agents.
- Designed and implemented a custom **AI orchestration harness** capable of executing the same programmatic skills **concurrently** across **multiple** tasks, enabling parallelized software development workflows.
- **Engineered** end-to-end development **workflows** covering feature **analysis**, technical planning, implementation, testing, and **deployment**.
- Integrated **AI agents** into structured **engineering processes** to **automate development** tasks, coordinate execution, and **improve consistency** across software **delivery**.
- Leveraged **Azure DevOps** for development lifecycle management and **CI/CD workflows**, alongside **Azure Cloud** infrastructure and services.

Senior Systems Architect and DevOps

Qyon

Ago, 2025 - Jul, 2026 | Americana - SP

Achievements/Tasks

- Definition and **documentation** of **software architecture** standards and development processes, increasing **efficiency** and **quality** of deliveries for a team of **20+ developers**;
- Complete **AWS infrastructure** management in **high-security militarized environment**, focusing on **cost** and performance **optimization**;
- **Optimization** of critical applications in Java and C#, **reducing** memory and CPU **consumption** through code refactoring and **performance** best practices;
- Advanced tuning of PostgreSQL and MySQL databases, including query **optimization**, indexes, and server configurations;
- **Conducting** technical **training** program for **development** team, covering architecture, best practices, and new technologies;
- **23% Reduction** in AWS costs.

WORK EXPERIENCE

Senior Development Analyst and Systems Architect
BTG Pactual (Brazilian Bank)
Mar, 2025 - Ago, 2025 | São Paulo-SP

Achievements/Tasks

- Complete **observability** implementation with **DataDog**, including dashboards, **alerts**, and Command Center integration, reducing **MTTR** of **incidents** in critical systems;
- Performance **optimization** resulting in **216% increase** in **efficiency** of **critical** applications through profiling analysis, code **refactoring**, and query **optimization**;
- Development of **fallback strategies** for critical **financial transactions** (PIX, TED), ensuring **high availability** even during external vendor failures;
- Technical **mentorship** of 4 **new developers**, accelerating **onboarding** and **alignment** with team practices;
- **Reduction** of team delivery **SLA** from 7 to 1 day through **process optimization**, automation, and improved **communication**;
- Implementation of **unit testing culture**, increasing coverage in critical applications and **reducing** production **defects**.

Mid-Level Development Analyst
Act Digital (Outsourcing at BTG)
Nov, 2023 - Mar, 2025 | Remote/Bauru-SP/São Paulo-SP

Achievements/Tasks

- Worked in multi-platform environments, integrating proprietary systems with focus on security, compliance, and best practices in the financial sector;
- Implementation of feature that reduced user friction in mobile app through optimization of biometric challenge flow;
- Optimization of BACEN-regulated system, reducing latency from 2s to less than 1s and ensuring compliance with regulatory requirements;
- Critical bug fixes and performance optimization in mission-critical legacy systems, elevating their reliability in high-demand environments.

Mid-level Development Analyst
Linx/Stone (Brazilian Bank)
Set, 2021 - Nov, 2023 | Remote/Bauru-SP/São Paulo-SP

Achievements/Tasks

- Developed and maintained Point of Sale (POS) solutions focused on **high availability** and fiscal **integration** (including Brazilian NFe and SAT standards).
- **Modeling** and **management** of complete Azure **infrastructure**, including SQL Database, AKS (Kubernetes), Application Insights, and CI/CD pipelines;
- **Technical training** of 4 developers, accelerating **team** integration and **productivity**;
- **Gathering** functional and non-functional **requirements** with major clients (Habib's, Bob's, Rei do Mate), translating **business** needs into scalable **technical solutions**.

Junior Software Developer
Ez.Devs (Outsourcing at Linx/Stone)
Set, 2020 - Ago, 2021 | Remote

Backend internship
Assertiva
Out, 2018 - Set, 2019

EDUCATION

Bachelor's Degree in Information Systems

UNESP Bauru - Universidade Estadual Paulista (São Paulo State University)

Jan, 2020 - Dez, 2024

Courses

- Equivalent to Computer Science.

IT technician

UNICAMP - Universidade Estadual de Campinas (State University of Campinas)

Jan, 2017 - Dez, 2019

PERSONAL PROJECTS

MongoDB Benchmark

Mai, 2023 - Mai, 2023

Key Features

- Project to benchmark various configurations of the mongoDB driver for .NET CORE.

Tool for insect behavioral analysis

Jan, 2024 - Present

Key Features

- Patented image analysis software with high economic and industrial impact.
- Used by 2 pharmacology laboratories at UNICAMP.
